(54) User interface for a radio telephone

(57) A radiophone comprises a user interface and a controller unit connected to the user interface. The user interface i.e. comprises a display and a keypad having at least one operation key whose function is controlled by the controller unit and is displayed in a predetermined area of the display. The function of said at last one op-

eration key is displayed in a predetermined area of the display. The radiophone is capable of assuming a plurality of states in which a group of predetermined actions associated with the state concerned may be performed by said at least one operation key. The controller unit displays one of said group of actions as a default function in the predetermined area of the display.

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 97 30 9433

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report. The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information
